About me

I started learning code a year ago, at first it was just a hobby. I learned C++ to make games, but I wanted to learn more about web development so I can make a career out of it.

I was studying IT in Majmaah University, and I still do but I took a break from it to focus more on front-end development.

I love art and tech, so I taught myself how to be a software engineer.

Experience

My Portfolio (<https://faresthedev.netlify.app>)

My latest project is my portfolio site, and I'm so proud of it, it has all my projects, all my information, and you can contact me through the form.
